

Meeting Report - February 28, 2025

Meeting Details

Date: February 28, 2025

Time: 3:00 PM – 4:30 PM

Attendees:

- Rohit Pillai
- Jenny Dobariya
- Harsh Kapoor
- Neeti Pandya
- Minhazul Islam Mahim

Objective

To begin development of backend features, align team members on post-report goals, and set the scope for Sprint 3.

Discussion Summary

- The team reviewed feedback from Progress Report 1 and discussed the roadmap for implementing backend functionalities.
- Discussions focused on the integration of authentication using NextAuth, Google, and LinkedIn sign-in methods, as well as securing user registration via Prisma and bcrypt.
- Each member was assigned backend-oriented tasks, including API creation, database model refinement, and connecting frontend components to server logic.
- Team also reviewed pending tasks from the frontend (e.g., template card interactivity and About Us layout) to be finalized alongside backend integration.

Decisions Made

- Backend development will begin immediately, focusing first on authentication and database setup.
- Unfinished frontend tasks from the last sprint will be completed in parallel to backend progress.
- Members will document backend endpoints and push authentication-related commits to a separate branch for review.

Conclusion

The project is entering its next phase, with backend features taking center stage. Coordination across frontend and backend tasks will be maintained through GitHub Issues and regular check-ins.
