Objective

To conduct an internal review of the system in preparation for the TA meeting on March 19 and ensure that all key features are stable and functional.

Discussion Summary

- The team conducted a walkthrough of the entire platform to check flow, performance, and user experience.
- Minor bugs were identified in the resume save function when switching between templates. UI inconsistencies in the About Us and Pricing pages were also documented.
- All integrated features — authentication, editing, Stripe billing, and chatbot — were tested and confirmed to be working as expected in most cases.
- A presentation outline for the TA meeting was created, showcasing each feature's demo order and which member would walk through which part.

Decisions Made

- All known bugs to be resolved before March 18 end-of-day.
- Members assigned sections to present during the TA meeting.
- Ensure GitHub is up to date with final commits and testing branches are merged before demo.

Conclusion

The project is in its final stretch. With most components ready, the team will now focus on polishing the platform and preparing a smooth, coordinated demo for the TA.
