Meeting Report - January 30, 2025

Meeting Details

Date: January 30, 2025
Time: 4:00 PM –6:00 PM
Attendees:

- Harsh Kapoor

- Priyanshu Vora

- Jenny Dobariya

- Rohit Pillai

- Neeti Pandya

- Minhazul Islam Mahim

Objective

The objective was to set up the project's GitHub repository, configure version control, and discuss the development stack setup.

Discussion Summary

- A central GitHub repository was created for the project.
- The branching strategy was discussed: each team member will work on a feature branch before merging to the main branch.
- GitHub Issues will be used to track progress and manage tasks.
- The team decided to use T3 Stack (Next.js, TypeScript, TailwindCSS, tRPC, Prisma) for development.
- Initial setup of the project was completed, ensuring each member could run the code locally.

Decisions Made

- Feature-branch workflow will be followed.
- GitHub Issues, pull requests, and code reviews will be used to maintain quality.
- T3 stack will be used as the development stack.

Conclusion

The meeting was efficient in defining the GitHub project management workflow and deciding on the stack for the project. The next phase is implementation, where you will each work on your assigned pages and document the setup processes.
