Meeting Report - March 4, 2025

Meeting Details

Date: March 4, 2025

Time: 4:00 PM – 5:30 PM

Attendees:

- Rohit Pillai
- Priyanshu Vora
- Jenny Dobariya
- Harsh Kapoor
- Neeti Pandya
- Minhazul Islam Mahim

Objective

To review progress on authentication, API functionality, and ensure synchronization between frontend and backend workstreams.

Discussion Summary

- The team tested the integration of the registration and login APIs using Prisma and bcrypt, with support for session handling via NextAuth.
- Social login using Google and LinkedIn was debugged and updated, with a few pending issues related to redirect URIs still being investigated.
- The frontend resume editor was tested with backend data flow for saving/resuming changes. Adjustments were made to handle user-specific resume states.
- Members discussed and shared updates on their assigned modules, ensuring all endpoints are documented and used consistently on the frontend.

Decisions Made

- Backend commits will now be merged to the 'main' branch after code review and testing to avoid stale branches.

- Final fixes for Google and LinkedIn OAuth to be prioritized before the next internal demo.

- Resume save/load API endpoints will be finalized by March 7 and integrated with frontend by all editors.

Conclusion

The backend is progressing steadily, with key APIs and authentication nearly complete. The team will focus on finalizing integrations and preparing for full feature testing in the next sprint.
